

Light is vision.

Life Science

From vision to reality: in Life Science Volpi is your reliable OEM supplier.

The fiber optic and optoelectronic components are developed and produced as key modules for highly complex devices. In addition to the process-oriented quality management system under ISO 9001:2008, Volpi is also certified as a manufacturer of medical devices under the ISO 13485:2008 standard.

Full compliance with the terms of delivery, quantity and quality is a priority for Volpi. As a high-tech company we are a reliable partner in the industry and always integrated into the production and logistics systems of our customers.

Applications:

- Applied Science
- Molecular diagnostics or in-vitro diagnostics (e.g. polymerase chain reaction)
- Luminescence detection
- Spectroscopy
- Laboratory automation (liquid handling & robotics)
- Monitoring of medical parameters

Technical Expertise:

- Optoelectronic modules for fluorescence analysis (for in-vitro diagnostics)
- Fiber optic components for diagnostic devices
- OEM subsystems for laboratory automation
- Fiber optic and LED
