

Light is vision.

## Light Emitters

Today's market for light emitters of different technology classes is extensive and tends to be confusing. Our engineers continuously monitor the market for current trends.

### Light Emitters

- Light Emitting Diode (LED)
- High-Power LED
- Organic Light Emitting Diode (OLED)
- Laser
- Halogen
- Xenon
- Metal halide
- Deuterium
- Gas discharge lamps

### Spectrum

- Ultraviolet (<380nm)
- Visual Light (380nm bis 680nm)
- Infrared (>680nm)

UV
