

Light is vision.

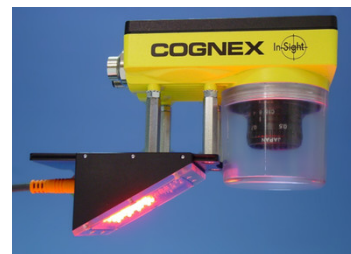

## Cognex® Corner

Cognex Corporation is the world's leading provider of vision systems, vision software, vision sensors and surface inspection systems. Volpi provides the most efficient and well attuned lighting components for several of the Cognex vision and sensor systems.

### Low Angle Illuminator for Cognex Insight

Provides incident light at a 30 degree angle to create increased contrast between the part surface and part features. Features SMD LED generated illumination that increases product life and provides high intensity, uniform light output.

» [Low Angle Illuminator](#)

### ILP LED Brightfield 100 Ringlight for Cognex Insight

Provides intense and very uniform illumination that can be focused over a large working distance. Features SMD LED generated illumination that increases product life and improves image clarity by reducing shadows. An intense 3.5" illuminated area can be maintained over a 2" – 4" working distance.

### ILP LED Darkfield Ringlight for Cognex Insight

Provides intense shadow-free and homogeneous illumination. Features SMD LED generated illumination that results in improved light output, increased life expectancy and a working distance ranging from 20mm to 50mm.
